SARANRAJ S

Full Stack Developer | MERN Stack | Python Developer

saranraj1552003@gmail.com | +91 7010145439 | Chennai, TamilNadu | https://www.linkedin.com/in/saranraj-s-368674224/ https://saran-raj-portfolio.netlify.app/ | https://github.com/Saran1527

PROFILE

Software Engineer with experience building scalable full-stack web applications using Python, JavaScript, React.js, Node.js, Express.js, and Django. Strong knowledge of Data Structures, Object-Oriented Programming, REST APIs, Microservices, and Cloud fundamentals. Skilled in developing high performance backend services, responsive user interfaces, and AI-powered applications. Passionate about solving real-world problems, writing clean maintainable code, and contributing to agile engineering teams

EDUCATION

Bachelor of Engineering - Electronics And Communication Engineering, 2020 – 2024 | Melmaruvathur, Tamil Nadu
Adhiparasakthi Engineering College
CGPA: 8.5/10 (85%)

SKILLS

Frontend — Proficient
React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design, Material UI (MUI),Component-Based Architecture, State Management

Databases — Proficient
MongoDB, MySQL, PostgreSQL, SQLite, Data Modeling, CRUD Operations, Query Optimization

Tools & Development & APIs — Proficient
REST APIs, API Integration, WebSocket (Basic), API Testing with Postman, API Documentation (Swagger / OpenAPI)Git & GitHub, VS Code, NPM / Package Management, Version Control,Agile Development Practices, AWS EC2 (Basic Deployment), Docker (Containerization – Basic), CI/CD using GitHub Actions

Soft Skills — Proficient
Problem Solving, Analytical Thinking, Communication, Team Collaboration, Adaptability, Time Management, Continuous Learning, Attention to Detail, Self-Motivation, Agile Mindset

Backend — Proficient
Python, Node.js, Express.js, Django, FastAPI, RESTful API Development, JWT Authentication, Middleware & API Security

AI & Generative AI — Proficient
Generative AI Applications, Prompt Engineering, Google Gemini API Integration, AI Chatbot Development, Embedding Generation,Semantic Search

Software Engineering Practices — Proficient
Data Structures & Algorithms, Object-Oriented Programming (OOP), Design Patterns (Basic), Unit Testing (Basic), Debugging & Logging, Code Optimization

PROFESSIONAL EXPERIENCE

ACSASS, *Software Developer* 02/2025 – 03/2026 | Chennai

- Engineered scalable full-stack applications using React.js, Node.js, and Python, serving 500+ internal users with 99.9% uptime
- Optimized API response times by 35% through database query optimization, caching strategies, and code refactoring in high-traffic modules
- Architected RESTful APIs handling 10K+ daily requests with focus on reliability, error handling, and consistent response times
- Enhanced system observability by implementing comprehensive logging and monitoring, reducing mean time to resolution (MTTR) by 40%
- Collaborated with cross-functional product teams in Agile sprints to translate business requirements into technical solutions
- Mentored 2 junior developers in code reviews, best practices, and debugging techniques, accelerating their onboarding by 50%
- Established CI/CD pipelines using GitHub Actions for automated testing and deployment, reducing release cycle time by 30%

DevTown, *Software Developer Intern* 06/2025 – 07/2025 | Chennai

- Assisted in building full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Built RESTful APIs using Node.js and Express.js for efficient frontend–backend communication.
- Created responsive and dynamic user interfaces using React.js, HTML5, CSS3, and JavaScript (ES6+).
- Integrated backend functionalities using Python frameworks such as Django / FastAPI.
- Structured and managed databases using MongoDB and SQL, including schema design and query optimization.
- Configured user authentication and authorization using JWT and secure login systems.
- Utilized Git and GitHub for version control and collaborated with team members in an Agile development environment.

PROJECTS

Student & College Management System, *(Python Full Stack)*

- Engineered and improved a full-stack application using Django and MySQL to manage students, faculty, and course information.
- Integrated role-based dashboards for administrators, faculty, and students following access control guidelines.
- Optimized modules for enrollment, attendance tracking, examinations, and result processing.
- Deployed the application using Docker containers on AWS to ensure scalability and operational consistency.

Customer Relationship Management (CRM) System, *(Python Full Stack)*

- Developed a CRM solution to manage customer data, sales activities, and support tickets.
- Incorporated RESTful APIs to enable seamless customer communication and service history tracking.
- Maintained data accuracy, quality assurance, and consistent application behavior.
- Performed data analysis and visualization to evaluate customer engagement and retention.

AI Website Chatbot – FastAPI & Gemini Integration, *(Python Full Stack)*

- Created an AI chatbot that analyzes a given website URL and answers user questions based on its content.
- Built backend APIs using FastAPI and Python for content extraction and processing.

- Connected Google Gemini AI to generate contextual answers from website data.
- Stored embeddings and page content in MySQL for efficient semantic search.
- Built REST APIs, error handling, and optimized response performance.

E-Commerce Application, *(Python Full Stack)*

- Enhanced a full-stack e-commerce platform using Django, Python, MySQL, ReactJS.
- Built product catalog, user authentication, cart management, and order processing modules.
- Designed RESTful APIs and integrated backend logic with responsive frontend components.
- Ensured validation, exception handling, and logging to ensure system reliability.
- Followed MVC architecture and documented system design for maintainability.

Library Management System, *(Mern Stack)*

- Upgraded a library management system to automate book tracking, borrowing, and member management.
- Built a responsive user interface using React.js with a structured backend and SQLite database.
- Implemented form validation, error handling, and search functionality to improve usability and reliability.

Real-Time Chat Application, *(Mern Stack)*

- Built and improved a real-time messaging application using Socket.IO for bi-directional communication.
- Created frontend components with React.js and backend services using Node.js and Express.js.
- Incorporated user authentication, live messaging, online status monitoring, and chat rooms.
- Managed and managed chat history securely using MongoDB.

11s App – Backend Development, *(PHP, Laravel, MySQL, REST API)*

- Architected and developed scalable RESTful APIs using Laravel, enabling seamless communication between frontend and backend systems.
- Established secure authentication and authorization mechanisms, protecting application endpoints and user data.
- Leveraged Laravel's MVC architecture to build clean, modular, and maintainable backend code.
- Boosted backend performance by optimizing API responses, database queries, and application logic for better efficiency and scalability.

AWARDS

Trailblazer Achievement Award 2025–2026, *Acsass* 21/02/2026

Honored to receive the Trailblazer Achievement Award 2025–2026 at the 10th Annual Meet. This recognition celebrates the courage to create new paths, drive innovation, and contribute meaningful impact within the organization.

Grateful for the support, encouragement, and trust from my team and leadership. Looking forward to continuing the journey of growth, collaboration, and excellence.

CERTIFICATES

- **Full Stack Web Developer** – DevTown
- **Python Programming -** Campus Connection
- **Web development** - CodeBind Technologies
- **Developer Virtual Experience Program -** Accenture
